

Trees for the Future
Presents This
Certificate of Tree Planting
In Honor of
Brandy Pockrus

Green Van Lines is having a grove of 50 trees is being planted for the benefit of an entire community and our environment.

These trees, planted in the developing world, will sustainably benefit lands and communities devastated by deforestation and increasingly global climate change. These fast-growing, permanent, multi-purpose trees will protect fragile and eroded lands. They will improve the food and water security of surrounding households and communities, and assure that families can continue to live in dignity and in harmony with the natural resources of their lands. Each year, these trees will remove many tons of pollution from the global atmosphere, replacing it with life-giving oxygen, while assisting the natural return of past diversity..
